

Guide

1 Move to the folder Tutorial-5

2: type in **npm install** to install node modules.

3: type in **npm start** to start the project.

Contribution:

(**script/initial_mongo.js**, **server/server.js** and the **react-script start** has been combined together in **src/package.json**, so we can start the project by **npm start**)

Port

GraphQL server is at port 5000/graphql, express server is at port 5000 and React UI is at port 3000.
